

LAMATEK, the leader in tapes and gaskets for the fenestration industry, has added to their extensive product line. LAMATEK now offers butyl sealing gaskets specifically designed for aluminum and wood window and door manufacturers. Other new products include Extreme Environment Gaskets: high-tack gaskets engineered for low surface energy materials and cold weather applications with an overall temperature range of -30 to +225 degrees. Also, look for our new line of Protek film, a residue-free, removable transparent film used for protecting easily-scratched surfaces and keeping them dirt and grime free. And, don't forget our new line of structural glazing tape!
